### **Pet and Wild Animals Policy**

The presence of pets and wild animals on PI facilities is a cause for concern as it presents a:

- safety hazard from possible bites and scratches
- health hazard from animal droppings, hair and dander that could lead to allergies and respiratory problems, and
- hygiene hazard since we serve food in our facilities

We are therefore requiring that you do not feed, pet or otherwise encourage any animals, birds or insects on PI property. You are further advised that you are not allowed to bring pets of any kind on PI property. Violating this policy could result in disciplinary action. Your continued support for the PI community's health, safety and well-being is truly appreciated.
